CONTROLLED BY APP, SUITABLE
TO ANY BRAND OF CAR SEAT**

The Smart BABI pillow is a battery-operated device that connects wirelessly to your smartphone. Thanks to its App, it allows you to monitor the presence of the child in the car seat, signaling with special alarms if the child is left in the vehicle. As required by law. Up to 4 cushions can be connected and monitored simultaneously. Furthermore, the App allows you to share the pillow with other users and warn them in case of emergency through notification.
