

TS6809 DVB-T2 HEVC

DVB-T2 HD H.265 Receiver - Videorecorder and Media Player

Art. Cod.: 21005294
EAN Code: 8051511391172

TELE System introduces the new TS6809T2 HEVC, the Digital Terrestrial Receiver with online features. Ready to receive the new DVB-T2 channels and online services. Thanks also to the HDMI port, it will provide the possibility to watch the TV in the highest audio/video quality. Connecting a HDD through the USB port located on the front panel, the user can easily record the favourite programs and movies just selecting the REC & PLAY function. The TS6809 could be also represent a media player device to play music, photos and video directly on the TV, also in the newest Mpeg4 H.265 compression. The LCN "Logical Channel Number" function sorts the channel list in a logic and automatic way, while the EPG "Electronic Program Guide" will provide always updated information.
